GETTING STARTED

Safety Advice

- Keep off the navigator and never adjust or perform any setting to the unit while driving. Always do the necessary adjustment and setting prior to starting your journey.
- Do not fix or mount the device on such part of the windscreen that will interfere with driving or be hazardous to the driver or occupants in the vehicle.
- Always obey traffic rules. If the navigator's instructions contradict with traffic rules, the traffic rules prevail.
- Do not leave your device in the vehicle while not in use to prevent theft. Exposing your device to high temperature when not in use may cause overheating and damage the product.

Acquiring GPS satellite signal

Always acquire GPS satellite signals before using the navigator for navigation. To acquire satellite signals and to lock on your current position, please ensure that your car is not under a roof, tree or any object that might block the navigator from acquiring satellite signal.

Once navigation software is launched, the system will automatically search for satellite signals. To lock on to your current position, the navigator must lock on to at least 3 satellites. To acquire your altitude information, fourth satellite is needed.

Satellite signals acquired.	No Satellite signal acquired.
